Summary

Full-stack software engineer with 4 years of experience delivering end-to-end features in high-velocity startup environments. Specialized in architecting scalable React/Expo interfaces and Nest.js/Node APIs with a focus on system reliability through automated E2E testing and TypeScript migrations.

Work Experience

HireMySub

Sept 2022 – Mar 2026

Full-stack Developer

Rexburg, ID

- Ensured 100% automated coverage of critical user flows, replacing manual QA and enabling the team to ship features with high confidence in application stability
- Eliminated the overhead of maintaining a separate documentation repository by automating API specs, ensuring the frontend team always had real-time access to backend contracts
- Worked closely with leadership to ship systems and resolve bugs across fintech, communications, QA
- Implemented **accessibility standards** (a11y) in a React application, ensuring compliance with WCAG guidelines, which improved user experience and accessibility for all users
- Assisted in creating E2E stripe signup system and created live Sendgrid/Twilio messaging system

Quikix

Sept 2024 – Mar 2025

Full-stack Developer

Rexburg, ID

- Co-authored a greenfield mobile application from concept to launch, architecting the core authentication flow, nested drawer navigation, and user-centric features using Expo Router
- Accelerated time-to-market by delivering a production-ready MVP from concept to App Store submission within a 7-month part-time contract
- Orchestrated a full-stack engagement engine, including a nested commenting system and voting logic, ensuring data consistency

Education

BS, Software Engineering

Jun 2023

Brigham Young University-Idaho

Rexburg, ID

Full Stack Bootcamp

Feb 2022

Nucamp

Remote

Projects

Dragons Nest

Jan 2026 - Present

- Architected a secure multi-tenant identity layer using AWS Cognito, integrating Google OAuth and JWT-based authentication to manage access across disparate user roles
- Engineered a dynamic, multi-step onboarding workflow for parents and students, utilizing a centralized state machine to ensure data compliance and a frictionless entry point into the platform
- Optimized the product roadmap by conducting usability testing with 10+ prospective users, transforming feedback into actionable engineering requirements
